DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II (claims 15-24 and 51-63) in the reply filed on 4/2/08 is acknowledged. Claims 1-14 25-50 and 64-70 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/2/08.
2. Claims 15-24 and 51-63 have been reconsidered and the following species election is deemed appropriate:

Species Election

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. Applicant is required to elect a single sequence specific cleavage agent for consideration – either a, b, or c.
 - a. the sequence specific cleavage agent cleaves on the C-terminal side of a lysine residue (claims 20 and 53),
 - b. the sequence specific cleavage agent comprises Lys-C (claims 21 and 54), or
 - c. the sequence specific cleavage agent comprises Trypsin (claims 21 and 54).

Art Unit: 1641

II. Applicant is required to elect a single lysine reactive agent for consideration - either d or e.

- d. the lysine reactive agent comprises biotin (claims 22 and 55), or
- e. the lysine reactive agent comprises a hindered Michael reagent (claims 23, 24, 56, and 57).

4. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. The claims are deemed to correspond to the species listed above in the following manner:

The invention of Group II (claims 15-24 and 51-63) is drawn to methods identifying and comparing polypeptide compositions. However the methods use independent and distinct reagents (sequence specific cleavage agent and lysine reactive agent) that restricted herein.

The following claim(s) are generic: claims 15-19 and 51-52.

Art Unit: 1641

6. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each of the reagents (sequence specific cleavage agent and lysine reactive agent) require separate search and consideration.
